

ARCHIVE LINK SYSTEM OVERVIEW

What is Centreviews Archive Link?

Centreviews provides a REST system that allows customers to find, add and update all data and documents stored within our Centreviews platform. Customers have complete access to all documents in the Centreviews system, for all integration needs. The interface follows the standard REST request and response specifications and is secured through the use of mutual certificate authentication between both the customer and Centreviews' infrastructure.

Can Customers View all Documents Through Centreviews?

Yes, customers can view clear images of each document they have uploaded. Documents are available around the clock and are stored in a clear location on a secure cloud-based interface. The cloud enables customers to access documents from any location, so long as there is an internet connection.
